
End-to-End Cryptographic Governance & Auditability:
• Append-only execution ledger: H_k = SHA-256(H_{k-1} || Record_Payload_k).
• Immutable dataset verification: b8792f8df375fccdbd800d440cc884ef2db2f860ff3533af01c70161a5cc1d15.
• Zero post-hoc sample pruning: 400/400 rollouts accounted for in factorial matrix (0 duplicates, 0 truncations).
